DESIGN

Cube 630 UM
Dimensions: 16 x 40 mm
Surface: white RAL 9010

Puristic Design

Do you love straight forms and noble materials? Are you a fan of the "bauhaus" style?

If it is so, the new Hoco Design strip CUBE offers the right opportunity to decorate your house in a contemporary style. The feeble and discret lacquered surfaces emphasise the natural charisma of the wood.

A reduced form and high-class surfaces: One can choose between real wood veneer, RAL varnishing, stainless steel surfaces and many more.

FUNCTION

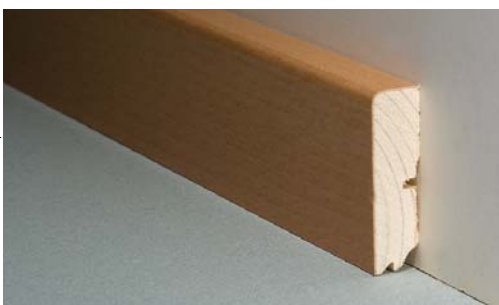

Profiles in different heights and appropriate for every application are setting a creative accent.

CUBE 630 UM

Dimensions: 16 x 40 mm
surface: noble, matt varnished
core: spruce, certificated PEFC

CUBE 631 UM

Dimensions: 16 x 58 mm
surface: noble, matt varnished
core: spruce, certificated PEFC

CUBE 633 UM massive

Dimensions: 16 x 58 mm
surface and core: constant massive hardwood

CUBE 632 UM

Dimensions: 16 x 78 mm
surface: white RAL 9010
core: high quality MDF

Special dimensions, different species of wood and individual design are possible material-related.

CUBE 633 massive
Dimensions: 16 x 58 mm
surface and core: constant massive oak

CORES

high quality MDF

constant massive

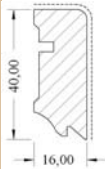

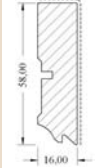

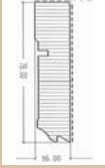

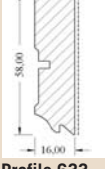

spruce-core,
certificated PEFC

Assembly:

Every CUBE profile can be fixed with a HOCO function strip, no screws can be seen on the surface. The function strip has to be screwed, glued or nailed onto the wall. The CUBE-system is simply clicked on it. Beneath the esthetic advantage there are

many technical ones: **better noise insulation, improved protection against humidity, better protection against dust.**
